WORK EXPERIENCE

Dolby (Dolby.io)   **Aug. 2020 – Present**
Software Engineer, Developer Programs   *San Francisco, CA*

- Develop demo applications using React, JavaScript, HTML and CSS to increase developer adoption of Dolby.io Communication APIs

- Build customized developer documentation experience using JavaScript, HTML and CSS that is viewed and used by 1000+ developers per week

- Planned and implemented custom search and filtering functionality using Algolia API that resulted in a project gallery with 60+ searches per week

- Develop internal tools and infrastructure using Node.js and Amazon Web Services (AWS)

- Led meetings to define and gather documentation landing page requirements and then utilized those specifications to build and deploy landing page within a span of three weeks

- Wrote blog demonstrating how to build an authentication server using AWS

- Lead the Dolby Indigenous Employee group, moderating a company-wide event attended by 70+ employees

LaneOne   **April 2019 – May 2020**
Software Engineer   *San Francisco, CA*

- Developed front-end and back-end features for both consumer-facing web application and internal CMS using Ruby, Ruby on Rails, JavaScript, PostgreSQL, HTML, CSS and Bootstrap

- End to end ownership of features such as integrating a third-party API to allow users to purchase trip insurance

- Implemented test driven development (TDD) using Rspec

The Relish Media Group   **Jan. 2019 – Feb. 2019**
Software Engineer Intern   *San Francisco, CA*

- Integrated D3 with React and Redux to create data visualizations showing number of new users

Adda Clevenger School   **Aug. 2015 – May 2018**
Music Teacher and Band Director   *San Francisco, CA*

- Taught general music and band classes grades TK-8, developing a school band program from the ground up
